

ALEKSANDR TSEKNOH

CSR B

My name is Aleksandr, and I am a long-term member of the Queen Margaret Union. Having been a part of it since 2018, I was elected Tech convenor in 2020 and worked tirelessly over summer to see the union go through covid transition and organize freshers' week to the best of our abilities, which resulted in us running QMUTV. This position is my final run, where I will focus on a safe experience transition to the next volunteer generation, and make sure that future of QM will preserve the knowledge of people who came before them.

As it happens, a lot of resident QMU members, including myself, will be graduating this year, with many new people taking their positions. With this being my final position at the union, I intend to focus on achieving a safe transition period and making sure that none of the people who leave the union would take their knowledge and experience with them, leaving the next generation of board members at a disadvantage.

I also intend on finishing the currently remaining and active projects that I am a part of, those being:

- Upgrading the IT infrastructure of the union to support faster internet and more people being able to access it.
- Streamlining of the internal tools to ensure better record keeping and membership management.
- Ensuring better collaboration between school of computing science and the management in regards to the QMU study space on the second floor.

I would also like to take this moment to extend the deepest gratitude to all the people that have been by my side since I joined the union in 2018, starting from a Tech convenor whose team I joined back then, and finishing with the current candidates for the executive positions. Thank you!
