

# ADAM MEEK

## CSR B Candidate

I'm Adam, a computer science student and outgoing First Year Current Student Representative who predictably likes tech and has previously fixed one of the lights in the QMU bar. This time, I plan to dwarf my previous accomplishments and create a reliable, permanent setup for two backlights in this same location. Yes, this issue is my whole manifesto - sue me. If you want performers in this venue to be lit marginally better, I am your only hope. On a serious note, I've been at the QMU for over a year now and have loved being part of it.

Last time, I made a promise to fix a light in the QMU bar and I achieved this goal within a week of being appointed FYCSR. However, in recent months this light was taken down by notorious dog kicker (for legal reasons that's a joke) Grant Simpson, as it became apparent that having a light in this location simply wasn't very useful. So, this year I plan to go even bigger in my quest to improve the AV capabilities of the union.

The QMU bar has long suffered from a copious amount of frontlighting, with little backlighting whatsoever. In an effort to combat this, I plan to run a DMX line (through use of a splitter) to the back of the stage in an unintrusive and effective way. This will allow for two (2) existing RGBW wash fixtures to be plugged directly into the lighting control system, providing adequate backlighting for all occasions. Elsewhere, I will continue my campaign for more XLR cables, the acquisition of which will aid in completing my aforementioned master plan. I am confident that doing this will result in a 500% increase in student satisfaction (as estimated by me).

Also, world peace. Yeah that.
